PATIENT REPORT

Patient No :	 ML26258794	 TRACK ONLINE	Order No:	 ML26258794
Name :	MARYAM NAWAZ		Location Name:	ZEENAT LAB
Age/Gender :	21 Y / Female		Collection Date/Time:	18-12-2021 01:48 AM
CNIC :	35301-9909804-6		Report Date/Time:	19-12-2021 03:08 AM
Passport :	JH9618041		Flight No:	ER-723
Phone :	000000000000		Flight Date:	20-12-2021 11:25 AM
Address:	N/A	Ticket No/PNR:	K0H0D0	
		Ref By:	SERINE AIRLINE	
		Destination:	DUBAI	

Collection Center: **Zeenat Lab**

MOLECULAR BIOLOGY

Division Of Molecular Diagnostics

Reason for Request: COVID-19 PCR.

Source: Oropharyngeal Swab & Nasopharyngeal Swab.

Result: COVID-19 RNA Not-Detected

Method:

High efficiency nucleic acid release technology is applied in this assay to achieve ultra-rapid release of viral nucleic acids. Extracted RNA is used for probe-based fluorescent PCR to detect the corona virus 2019 (COVID-19) RNA. Specific primers and probe are used to detect ORF1 ab gene of COVID-19. As accuracy of PCR from Oropharyngeal swab and/or Nasopharyngeal swab is about 60%. This result might be used to aid in the diagnosis of COVID-19 infection. It should not be used as conclusive evidence of the infection nor exclusion of the disease.
