

ZEENAT LABORATORIES (TML)

Head Office 36, Lawrence Road, Lahore Punjab Pakistan

Tel:0423-6361417 Phone: 0312-4982126

Website : www.zeenatlabs.com

PATIENT REPORT

Patient No : 

ML26258794

Name : **MARYAM NAWAZ**

Order No:

ML26258794

Age/Gender : 21 Y / Female

Location Name:

ZEENAT LAB

CNIC : 35301-9909804-6

Collection Date/Time:

18-12-2021 01:48 AM

Passport : JH9618041

Report Date/Time:

19-12-2021 03:08 AM

Phone : 000000000000

Flight No:

ER-723

Address: N/A

Flight Date:

20-12-2021 11:25 AM

Ticket No/PNR:

MVVEVN

Ref By:

SERINE AIRLINE

Destination:

DUBAI

Collection Center: **Zeenat Lab**

MOLECULAR BIOLOGY

Division Of Molecular Diagnostics

Reason for Request: COVID-19 PCR.

Source: Oropharyngeal Swab & Nasopharyngeal Swab.

Result: **COVID-19 RNA Not-Detected**

Method:

High efficiency nucleic acid release technology is applied in this assay to achieve ultra-rapid release of viral nucleic acids. Extracted RNA is used for probe-based fluorescent PCR to detect the corona virus 2019 (COVID-19) RNA. Specific primers and probe are used to detect ORF1 ab gene of COVID-19.

As accuracy of PCR from Oropharyngeal swab and/or Nasopharyngeal swab is about 60%. This result might be used to aid in the diagnosis of COIVD-19 infection. It should not be used as conclusive evidence of the infection nor exclusion of the disease.
